COMPANIES TAKING ACTION

Meet the companies already setting their emissions reduction targets in line with climate science. This group continues to grow as more business leaders see the benefits of taking ambitious climate action.

Companies can commit to setting a science based target by joining the **Call to Action**, or by pledging via **We Mean Business**. Either way, they will need to meet the same criteria to get their targets approved. **Find out how your business can get involved** and **what corporate leaders are saying about science based targets**

Commit To Setting Science Based Targets

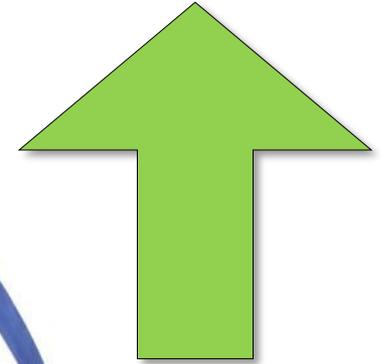

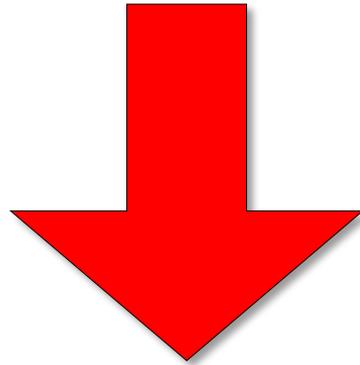

Start your company on the path to setting science based emissions targets

The Science Based Targets initiative is a partnership between CDP, UN Global Compact, WRI and WWF, which helps companies determine how much they must cut emissions to prevent the worst impacts of climate change.

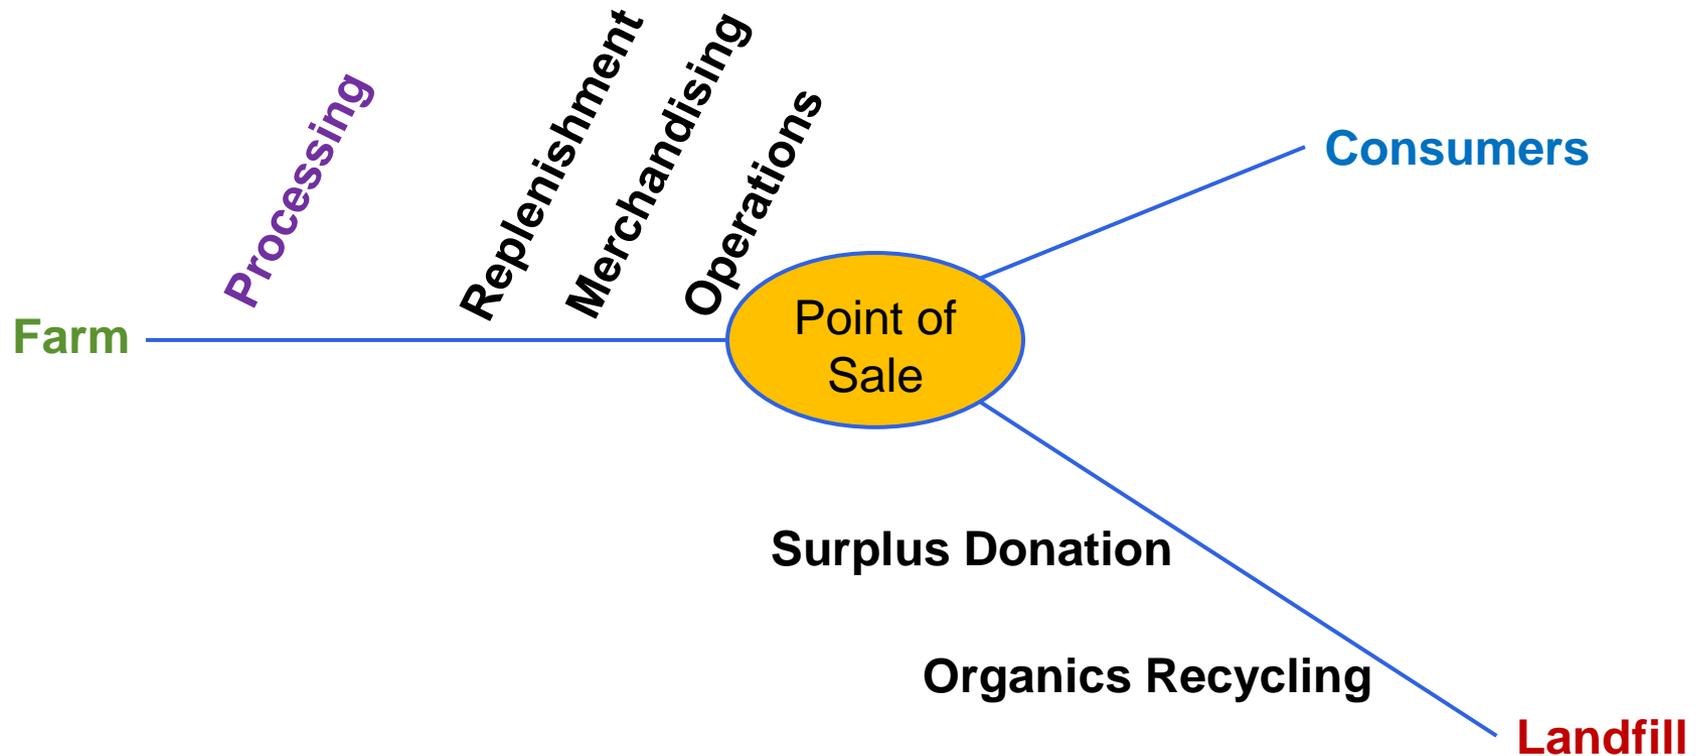

WMT private brands contain CSPO

Plastic bag user-fee initial impact

Retail Food System

Food-preservation packaging

Reduce-for-quick-sale programs

Surplus food donated to food rescue and recovery partners

Food Banks
Canada

Organic waste recycled through anaerobic digestion and compost
